

FARM RESCUE

Responding to Incidents and Emergencies in Agricultural Settings

Acknowledgments

Farm Rescue: Responding to Incidents and Emergencies in Agricultural Settings is a complete revision of *Farm Accident Rescue*, NRAES-10. First published and distributed by NRAES in 1980, *Farm Accident Rescue* underwent slight revisions in 1982 and 1986. Since 1980, NRAES has sold over 136,000 copies of this publication. It has been used as a training manual for agricultural safety programs throughout the United States and Canada and, in this revised form, should continue to be a valuable resource for years to come.

This publication is based upon work supported, in part, by the Extension Service, U.S. Department of Agriculture, under special project number 94-EDFA-1-9001. Special thanks are due to Eric Hallman, Davis Hill, and Dennis Murphy. Eric Hallman initiated this revision in 1995 and provided guidance on the update of some sections. Davis Hill's knowledge of farm rescue techniques was invaluable in ensuring an accurate publication. Dennis Murphy's knowledge of silo incidents was essential to ensuring that that section of the book is current and accurate. All three provided encouragement throughout the revision process. Special thanks to Temple Grandin, Assistant Professor, Department of Animal Sciences, Colorado State University, for providing extensive guidance on chapter 5, "Farm Animal Incidents."

This publication has been peer-reviewed by the persons listed below. It was judged to be technically accurate and useful for cooperative extension programs and for the intended audience. The authors are grateful for the many comments provided by reviewers, as they helped to add clarity and depth to the information in this publication.

Ellen L. Abend • Extension Support Aide • Agricultural Health and Safety • College of Veterinary Medicine • Cornell University

Bob Aherin, Ph.D. • Professor and Extension Agricultural Safety Specialist • Department of Agricultural Engineering • University of Illinois

Bob Baker • Fire Chief • Instructor in Fire, Rescue, and Agricultural Rescue • Farmedic, West Virginia University Fire Service Extension • Reynolds Store Fire/Rescue Company; Frederick County, Virginia

Tom Bean • Associate Professor and Safety Specialist • Department of Food, Agricultural, and Biological Engineering • The Ohio State University

Diane L. Chamberlain • Extension Support Aide • Agricultural Health and Safety • College of Veterinary Medicine • Cornell University

Darcy M. Demmin • Former Extension Support Aide • Department of Agricultural and Biological Engineering • Cornell University

Temple Grandin • Assistant Professor • Department of Animal Sciences • Colorado State University

Eric M. Hallman • Director • Agricultural Health and Safety • College of Veterinary Medicine • Cornell University

Glen H. Hetzel, Ph.D. • Associate Professor and Extension Agricultural Engineer/Safety • Department of Biological Systems Engineering • Virginia Polytechnic Institute and State University

Davis Hill • Executive Director • FARMEDIC National Training Center • Alfred State College • Alfred, New York

Ron Jester • Extension Safety Specialist • Department of Bioresources Engineering • Cooperative Extension Service • University of Delaware

John Kramer • Extension Assistant, Agricultural Safety and Health • Department of Biological and Agricultural Engineering • Kansas State University

Dave Morgan • Extension Safety Engineer • Department of Biological Systems Engineering • University of Nebraska

Dennis J. Murphy • Professor and Extension Safety Specialist • Department of Agricultural and Biological Engineering • The Pennsylvania State University

David Oliver • Lead Instructor • FARMEDIC National Training Center • Alfred State College • Alfred, New York

John G. Pollock • Safety Program Leader (Retired) • Department of Agricultural and Biological Engineering • Cornell University

Mark A. Purschwitz • Associate Professor and Extension Agricultural Safety and Health Specialist • Department of Biological Systems Engineering • University of Wisconsin–Madison

Charles V. Schwab • Associate Professor and Extension Safety Specialist • Department of Agricultural and Biosystems Engineering • Iowa State University

Terry L. Wilkinson, Ph.D. • Manager, Agricultural Safety • National Safety Council • Itasca, Illinois

Charles H. Wood • Regional Coordinator • Maryland Fire and Rescue Institute (MFRI) • University of Maryland

Many NRAES staff members have assisted in this revision since 1990. Marty Sailus, NRAES director, oversaw the project, reviewed drafts of manuscripts and illustrations, and edited the technical content. Jeff Popow, NRAES managing editor, organized and copyedited the first draft and also designed the final publication. Mary Lash, NRAES production editor, copyedited the finished manuscript and helped coordinate the development of illustrations. Paula Kowal, former NRAES production editor, coordinated the peer review process and the development of illustrations. Thanks to Topaz Publications and The Art Department for developing the illustrations.

Disclaimer

To simplify information and illustrations, trade names have been used in this publication. No endorsement of named products is intended, nor is criticism implied of similar products that are not mentioned. NRAES makes no warranties, express or implied, concerning the accuracy, application, or use of the information mentioned or described in this publication. Further, nothing in this publication is intended as medical or legal advice. Competent professionals should be consulted on medical or legal issues, if any, arising from the use of the information contained in this publication.

FARM RESCUE

Responding to Incidents and Emergencies in Agricultural Settings

Contents

Chapter 1:

Overview of Farm Rescue

Purpose of This Handbook.....	1
Overview.....	1
Organization of the Rescue Team.....	3
General Rescue Procedures.....	3
Contacting Help.....	4
Rescue Situations.....	5
Disclaimer.....	5

Chapter 2:

Agricultural Equipment Injuries and Rescue

Tractor Overturns.....	6
Power Takeoff Driveline (PTO) Entanglements.....	12
Hydraulically Operated Equipment Failures.....	15
Mixer Wagon and Self-Unloading Wagon Entanglements.....	18
Auger and Elevator Entanglements.....	20
Electrocution.....	24
Harvesting Equipment Injuries and Emergencies.....	25

Chapter 3:

Farm Structure Emergencies

Grain Entrapments — On-Farm Storage.....	32
Sidebar: Essential Safety Precautions When Entering Confined Spaces.....	35
Silo Incidents — Gas Exposures, Unloader Entrapments, and Fires.....	40
Emergencies Involving Manure Storage Sites and Facilities.....	52
Sidebar: Gases Commonly Released by Manure.....	53

Chapter 4:

Farm Chemical Exposures, Fires, and Spills

Exposure to Anhydrous Ammonia.....	56
Agricultural Chemical Fires.....	58
Pesticide Exposure and Spills.....	61

Chapter 5:

Farm Animal Incidents

Injuries.....	63
Rescue Procedures — Animal Incidents.....	63
Real-Life Scenario.....	65

Appendix A:

Rescue Tool Inventory Guidelines..... 66

Appendix B:

Agricultural Operator Control Symbols..... 70

Appendix C:

Follow-up Training and Suggested Readings..... 72

Emergency Telephone Numbers..... 77

About NRAES..... 78

Figures

Chapter 1: Overview of Farm Rescue

1.1	Potential farm hazards	1
1.2	Farm-related injuries can occur in difficult locations.....	2
1.3	The Incident Command System	3
1.4	Three steps to stabilization for safety.....	3
1.5	Caring for amputated tissue.....	4

Chapter 2: Agricultural Equipment Injuries and Rescue

2.1	This tractor rolled down a hillside and trapped the operator underneath	6
2.2	Reasons for side overturns.....	7
2.3	Reasons for rear overturns.....	7
2.4	Properly securing and transporting a patient can prevent additional injuries, especially to the spinal cord	8
2.5	Typical shutoff locations for diesel tractors	9
2.6	Engine stop decals	9
2.7	Location of the throttle	9
2.8	Diesel fuel injection pump shutoff	10
2.9	Fuel tank shutoff.....	10
2.10	Stopping an engine by using a CO ₂ extinguisher.....	10
2.11	Wedges and cribbing	11
2.12	Air bags	11
2.13	Hydraulic jack	11
2.14	Connecting the power takeoff driveline (PTO) for power transfer	12
2.15	Power takeoff shaft (PTO) components	13
2.16	PTO coupler with a spring-loaded pushpin.....	13

2.17	Sliding collar PTO connector/couplers	13
2.18	This victim, who became entangled around the PTO driveline, is suffering from severe bleeding and arm injuries that may result in amputation	14
2.19	The hydraulic system.....	16
2.20	Securing hydraulic equipment.....	17
2.21	Disconnecting hydraulic couplings	17
2.22	Quick-disconnect hydraulic couplings	17
2.23	Self-unloading silage/forage wagon.....	19
2.24	Mixer wagon.....	19
2.25	Rotating the power takeoff driveline (PTO).....	19
2.26	Locating and separating the master link.....	19
2.27	Use cutting torches carefully during extrication.....	20
2.28	Portable auger.....	21
2.29	Spinning winch crank for raising and lowering the auger	21
2.30	Farm elevator.....	21
2.31	Lower the auger to increase stability, but avoid a position in which it may teeter-totter	22
2.32	Locking out an electrical switch or plug	22
2.33	Augers and elevators are frequently involved in on-farm electrocutions.....	24
2.34	Conventional hay baler.....	26
2.35	Round baler	26
2.36	Combine with a bean header	27
2.37	Corn picker	29
2.38	Snapping rolls.....	29
2.39	Snapping rolls.....	30
2.40	Husking bed.....	30

2.41	Placement of wedges to hold snapping rolls apart and keep them from turning	31
------	---	----

Chapter 3: Farm Structure Emergencies

3.1	Grain bins	32
3.2	Entrapment in flowing grain.....	33
3.3	Collapse of horizontally crusted grain surface ...	33
3.4	Collapse of vertically crusted grain surface	34
3.5	Grain bin and unloading auger	34
3.6	Rescuing a partially submerged victim in crusted grain	35
3.7	Respiratory protection for rescuers working outside the storage area	35
3.8	Rescuing a completely submerged victim.....	36
3.9	Rescuing a partially submerged victim	37
3.10	Grain rescue tube	37
3.11	Large-capacity grain storage facility	38
3.12	Conventional silos	40
3.13	Top-loading conventional silo	40
3.14	Oxygen-limiting silo.....	41
3.15	Roof of an oxygen-limiting silo.....	41
3.16	Inhalation of silo gas	42
3.17	Lock out the main power control for the unloader	42
3.18	Silo unloader.....	43
3.19	Attaching a rescue ladder to a silo.....	45
3.20	Removing a patient from a silo	46
3.21	Characteristics of stored silage or hay by percentage of moisture and dry matter	47
3.22	Thermometer and probe	48
3.23	Locating hot spots.....	49
3.24	Injecting water into hot spots via a probe.....	49
3.25	Below-ground manure storages.....	52
3.26	Open manure storage lagoon.....	53

3.27	Rescuing a victim from a below-ground manure storage.....	53
3.28	This below-ground manure storage has claimed the lives of two persons, the original victim and a would-be rescuer who entered the pit unprotected	53
3.29	If the victim manages to stay afloat, the rescue station can provide equipment for a rescue attempt	55

Chapter 4: Farm Chemical Exposures, Fires, and Spills

4.1	Anhydrous ammonia (NH ₃) nurse tank and field applicator	56
4.2	Eye irrigation for patients exposed to ammonia.....	57
4.3	Saturate clothing exposed to anhydrous ammonia with water before removing.....	57
4.4	Types of farm chemical emergencies	58
4.5	Contacting help for a chemical fire emergency	59
4.6	Protective clothing and respiratory protection are essential for chemical fire rescues	59
4.7	Fighting a chemical fire	60

Chapter 5: Farm Animal Incidents

5.1	Flight zone and animal-handling strategies.....	64
-----	---	----

Appendix A: Rescue Tool Inventory Guidelines

A.1	Cutting wedge blocks	67
-----	----------------------------	----

Appendix B: Agricultural Operator Control Symbols

B.1	Dashboard controls.....	70
B.2	Safety alert signals.....	70
B.3	Operational controls	71

Tables

Chapter 3:
Farm Structure Emergencies

3.1	Gases present in agricultural confined spaces.....	54
-----	--	----
