

WEEK OF AUGUST 20, 1989

# STATION NOTES

## MEDIA COMES TO GENEVA STATION

You've seen it on national television, in the local press, and, if you have been traveling, in the press from throughout the world. Making the first application of a genetically altered virus to a two-acre circular cabbage patch on the newly-purchased Hansen Farm was cause for news people from throughout the country to visit the Geneva Station. Scientists Alan Wood, Boyce Thompson Institute, and Tony Shelton, Geneva Entomology Dept, not only are doing outstanding science with this project, but also brought a highly complex subject to a level that lay people could understand. Consequently, press coverage throughout the world has been even better than anticipated. Special commendation goes to assistants, Mary Kroening (left) and Bill Wilsey (top photo with back to the camera - Tony is applying the virus) whose help was invaluable. Below, Director Plane talks to WTVH Channel 5 (Syracuse) reporter Dave Bullard.

## CALENDAR OF EVENTS

Wednesday, August 23, 4:00 p.m., director's office,  
*Geneva department chairs' meeting*

## POLICIES, PROCEDURES AND PEOPLE

Congratulations to Liz (Capozzi) and George Baroody on their marriage, Saturday, August 5. Liz is a secretary in the Department of Food Science.

## ENTOMOLOGY ENDS SOFTBALL SEASON ON TOP

B&P was "bugged" by Entomology in the second softball playoff game last Thursday night. The game ended with a final score of Entomology - 13, B&P - 2. Entomology proceeded to the Championships on Saturday and, after an exciting game, came out on top defeating Hort Science with a final score of 13-10.
