Planning Committee

This conference was made possible through the efforts of the following individuals:

- Michael E. Van Amburgh, Cornell University, Conference Chair
- Steve Bechard, Professional Dairy Heifer Growers Association
- Rick Canfield, Cargill Animal Nutrition
- Suzanne Demeester, Elanco Animal Health

- Mike Fowler, Land O' Lakes Animal Milk Products Company
- Curt Gooch, Cornell University
- Robert Graves, Penn State
- Harold House, Ontario Ministry of Agriculture and Food
- Robert E. James, Virginia Tech
- David Kammel, University of Wisconsin
- Jason Karszes, Cornell University
- Dan F. McFarland, Penn State Cooperative Extension
- Thomas Overton, Cornell University
- Jack Rodenburg, Ontario Ministry of Agriculture and Food
- Marty Sailus, NRAES
- Julie Smith, University of Vermont
- Jeff Tikofsky; Alltech, Inc.

Thanks to Speakers

The planning committee and NRAES would like to thank the speakers for their diligence in submitting their papers early enough so that these proceedings could be distributed at the conference.

About NRAES

See the inside back cover for information about NRAES, including contact information and a list of NRAES member universities.

About NRAES

NRAES, the Natural Resource, Agriculture, and Engineering Service, is a not-for-profit program dedicated to assisting land grant university faculty and others in increasing the public availability of research- and experience-based knowledge. NRAES is sponsored by fourteen land grant universities in the eastern United States (see map below). We receive administrative support from Cornell University, the host university.

When you buy books from NRAES, you are helping to improve the accessibility of land grant university knowledge. While 15% of NRAES' annual income is provided by member universities, the funds to publish new books and coordinate new conferences come from our customers through book sales, conference registrations, and occasional project-specific grants.

NRAES publishes practical books of interest to fruit and vegetable growers, landscapers, dairy and livestock producers, natural resource managers, SWCD (soil and water conservation district) staff, consumers, landowners, and professionals interested in agricultural waste management and composting. NRAES books are used in cooperative extension programs, in college courses, as management guides, and for self-directed learning.

NRAES publishes two types of books: peer-reviewed books and conference proceedings. Our peer-reviewed books are evaluated prior to publication for technical accuracy and usefulness to the intended audience. The reviewers may include university faculty, extension educators, potential us-

ers, and interested persons from government and agribusiness. Conference proceedings are not peer-reviewed. However, the authors of papers presented at NRAES-sponsored conferences are chosen for their recognized expertise. NRAES also distributes some videos related to waste management and fruit and vegetable production.

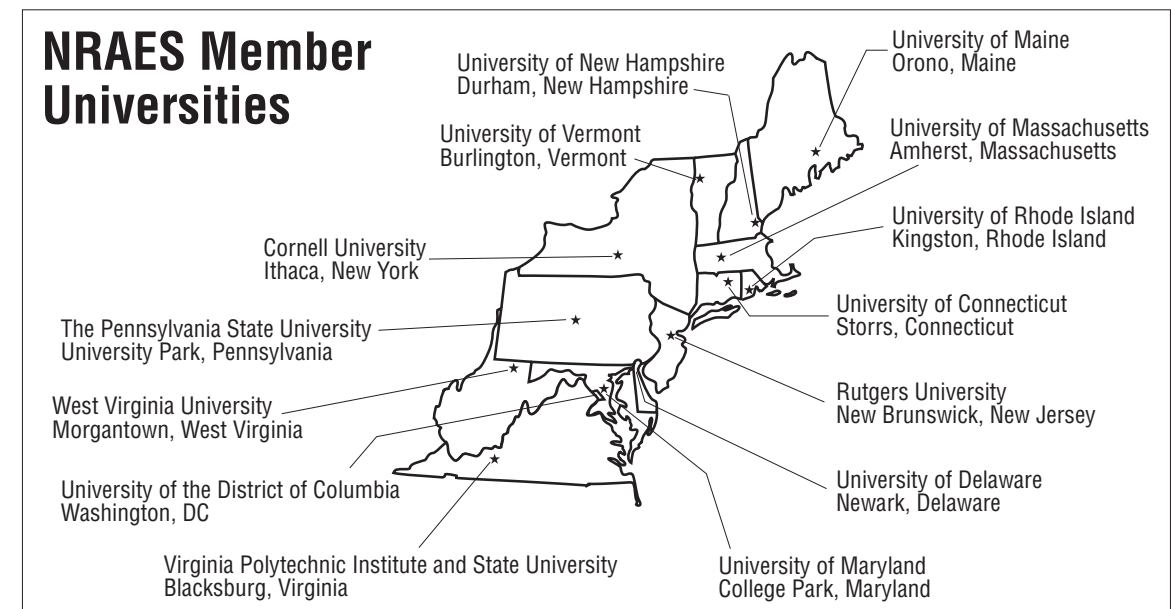

NRAES was started in 1974 and was originally known as the Northeast Regional Agricultural Engineering Service. In 1987, with encouragement from member university extension directors, NRAES began offering its services to faculty from all disciplines at member universities. In 1998, Virginia Polytechnic Institute and State University joined the original thirteen member universities. Our name was changed in 1998 to reflect the expansion of NRAES beyond the Northeast and the broadening scope of our books and conferences.
